### DETAILED ACTION

1. This office action is in response to communication filed on 6/9/2004 and 10/29/2004.
2. Claims 1-8 are presented for examination.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1-8 are rejected under 35 U.S.C. 102(a) as being anticipated by Shinichi et al. (JP 11283127 hereinafter Shinichi).

With respect to claims 1-2,5, 7, Shinichi teaches a point-service system that can be accessed by a customer using a terminal device (Abstract and Figure 1). A point database recording a number of points accumulated for a customer, the points being issued by one point usable facilities (paragraph 0008, lines 10-12); a use management database recording identifying information of the customer, a number of reserved points, a recognition code, and information indicating whether the number of reserved points is used (paragraph 0009, lines 4-14); means for issuing the recognition code for the reserved points in accordance with a use request with the number of reserved points from the customer (i.e. the customer receives the identification code in order to access the reserved points system)[0008]; means for recording the issued recognition code along with the number of reserved points in the use management database (0009,

Art Unit: 3622

lines 4-14); means for transmitting data of a point use ticket, comprising the number of reserved points that are issued and the recognition code for the number of reserved points, to the terminal device for use of the point use ticket by the customer (i.e. the user receives the points and the recognition code in order to access the system)[0008].

With respect to claims 3-4, 6, 8, Shinichi further teaches means for adding the number of points for the invalidated recognition code to the accumulated number of points for the customer to record the added number of points as a new accumulated number of points in the point database [0009].

### **Response to Arguments**

### **Conclusion**
